Town of Enfield Town Board
168 Enfield Main Rd
Ithaca, NY 14850

Dear Town of Enfield:

On October 26, 2016, the Town Board requested seven plans be presented to you for consideration of our application for the Wind Energy Permit. These plans had for the most part already been submitted to and approved by the town as part of SEQRA review, and re-submitted in updated form in September 2016.

They have all now been reviewed by LaBella Associates, with the exception of the Community Relations Plan, which received feedback from Frank Pavia, your attorney. Black Oak has incorporated all of LaBella's suggestions verbatim into the plans attached here. The only exception to verbatim inclusion of all LaBella's edits was one sentence about our FAA approvals having expired. Black Oak has renewed its FAA approvals continuously, with the most recent renewals in January 2017 for all turbine locations. The SWPPP is being drafted, and once it has been approved by DEC it will be provided to the town as per the Town Board's request.

Therefore, Black Oak requests that the Town Board renew discussion and consideration of the plans we present here, so that in two or three months' time, when DEC issues approval of our SWPPP and issues a SPDES permit with it, the Enfield Board will have had time to deliberate on all these other plans in the meantime.

Thank you for your continued time and attention to this project.

Marguerite Wells
