Description of Proposed Adjustments: These General Fund budget adjustments address spending in excess of the budget plan for a number of areas. Town Board contractaul expenses include the AOT conference and a number of public hearing notices. The audit contract cost increased over the prior year, plus the cost for actuarial services related to GASB reporting requirements are included here. Insurance and Dues were slightly higher than the budget estimate. And funds were added for beautification, and a Planning Board computer. Adjustments described thus far will be covered by contingency. There is also a recommended modification to reflect both the ARPA funds and expenditure for the food pantry. And, lastly, there is a recommended reclassification of debt service expense to reflect BAN intrest paid, and a small amount transfered to cover final project costs for the Salt Barn. More than enough was budgeted in bond principal to cover these costs.

Description of Proposed Adjustments: The Highway Fund budget adjustment reflects funds received for the sale of equipment and insurance recoveries, and allocates those monies for equipment purchases and contractual machinery repairs. In addition, adjustments are recommended to both revenue and expense to reflect the amount funded in the state budget for highway improvements and repairs. Finally, an increase in unemployment insurance costs will be funded by savings in workers compensation insurance. Unemployment costs are higher than originally anticiapted due to a correction in the contribution percentage based on payroll, which had not been properly updated in the past.

Motion was made by CP modifications as presented. Motion seconded by CP
